NOTES

1. This table replaces all previous oil selection information.
2. Temperature relates to:
  - \* Cooling air temperature to machine
  - \*\* Compression air inlet temperature
3. For compressors without thermostatic oil bypass use the grade shown in brackets ( ).
4. • Denotes synthetic oil. Not suitable for 4000 Series.
5. Oil change interval – refer to the user manual.
  - Indicates 4000 hours maximum oil change interval. All other oils for RA, 6000, 6000E and 6000N are for 2000 hours maximum. BROOMWADE 4000 HR oil is the recommended product.
6. Equivalent oils to those listed may be used at the recommendation and responsibility of the supplier.
